-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 25, 2005 has been entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Record et al (US Patent No. 5,372,824) for the reasons set forth in rejecting the claims in the last Office action.

Record et al disclose the combination of flavor and N-ethyl-p-menthane-3-carboxamide in the amounts claimed for use in chewing gums (see entire patent).

The claims differ as to enhancement and the specific flavors.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made to use any flavor in that of Record et al because the choice of flavor is seen to be no more than a matter of choice and well-within the skill of the art.

Applicant attaches no criticality to the flavor and discloses fruit, herbal, and spice flavors

Art Unit: 1761

and specifically states that "(o)ther flavors known to those skilled in the art may also be enhance" (see page 4, second full paragraph).

Enhancement would be obvious to that of Record et al as the same components are used.

Claims 9, 11, 13, 14, 16, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cherukuri et al (US Patent No. 5,009,893) for the reasons previously set forth in rejecting the claims (Paper Nos. 14 and 17).

Cherukuri et al disclose the combination of a flavor (e.g. mint and cherry) and N-ethyl-p-menthane-3-carboxamide in the amounts claimed for use in chewing gums and confections (see entire patent).

The claims differ as to enhancement and the specific flavors.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made to use any flavor in that of Cherukuri et al because the choice of flavor is seen to be no more than a matter of choice and well-within the skill of the art. Applicant attaches no criticality to the flavor and discloses fruit, herbal, and spice flavors and specifically states that "(o)ther flavors known to those skilled in the art may also be enhance" (see page 4, second full paragraph).

Enhancement would be obvious to that of Cherukuri et al as the same components are used.
